

OncoResponse

JOB TITLE: Intern – Cellular and Molecular Biology

OncoResponse Inc. is a clinical stage, privately held immuno-oncology biotech company based in Seattle, developing cancer immunotherapies using clues from the immune system of Elite Cancer Responders. In a broad strategic alliance with MD Anderson Cancer Center, OncoResponse deploys a proprietary B-cell discovery platform to identify and develop novel therapeutics targeting the tumor microenvironment. The company's lead candidate, OR2805, has entered clinical studies with a unique and transformative approach to the advancement of cancer therapeutics. Be part of an exciting discovery process in the fight against cancer. OncoResponse offers a team-oriented, stimulating work environment, along with competitive compensation, benefits, and stock options. Join a small, growing company and make a big difference! Please visit www.oncoresponse.com.

Please note: We are following robust COVID infection prevention guidelines. All of our employees who work on site are required to present proof of full vaccination status (unless they have a medical or other legal exemption).

To apply, please email your resume and a cover letter to careers@oncoresponse.com.

OncoResponse seeks an **Intern** for part-time research and lab management to support our efforts to develop antibody-based immunotherapeutics to treat cancer. In this role you will utilize a wide range of experimental techniques to support our efforts to develop antibody-based therapies. The position requires a background in cellular and molecular biology or related field, the ability to work on multiple projects simultaneously, and the enthusiasm to tackle new experimental techniques.

Responsibilities:

- Perform *in vitro* experiments requiring cellular, molecular, and immunological techniques, including BSL2 tissue culture, cell-based assays, and ELISAs
- Execute experiments with a careful attention to detail and accurate recording of procedures, data, and results
- Work closely with project lead at all levels (including experimental design, implementation, and analysis) to rapidly advance research plan
- Participate in interactions with team members to present data and provide input on next steps

Qualifications:

- Current enrollment in an undergraduate degree program in Cellular Biology, Molecular Biology, or related field
- Demonstrated experience with cellular, molecular, and immunological techniques, including BSL2 tissue culture, cell-based assays, and ELISAs is a plus
- Highly organized with the ability to design, schedule, and perform experiments and balance multiple project priorities
- Proficiency with Office (Excel, Word, PowerPoint) is required
- Experience with scientific analytical programs (Prism, FlowJo, ImageJ, etc.) is a plus

OncoResponse offers a diverse, inclusive environment, and is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, age, gender identity, sexual orientation, color, religion, sex, marital status, national origin, protected veteran status, disability status, or any other status protected by federal, state, or local laws. We are committed to growing a company of diverse, ethical, mission-driven people who respect and value each other's contribution and differences.
