

OncoResponse

JOB TITLE: Research Associate – Immuno-Oncology

OncoResponse Inc. is a clinical stage, privately held immuno-oncology biotech company based in Seattle, developing cancer immunotherapies using clues from the immune system of Elite Cancer Responders. In a broad strategic alliance with MD Anderson Cancer Center, OncoResponse deploys a proprietary B-cell discovery platform to identify and develop novel therapeutics targeting the tumor microenvironment. The company's lead candidate, OR2805, has entered clinical studies with a unique and transformative approach to the advancement of cancer therapeutics. Be part of an exciting discovery process in the fight against cancer. OncoResponse offers a team-oriented, stimulating work environment, along with competitive compensation, benefits, and stock options. Join a small, growing company and make a big difference! Please visit www.oncoresponse.com.

Please note: We are following robust COVID infection prevention guidelines. All of our employees who work on site are required to present proof of full vaccination status (unless they have a medical or other legal exemption).

To apply, please email your resume and a cover letter to careers@oncoresponse.com.

OncoResponse seeks a Research Associate to support the discovery and preclinical development of antibody cancer therapeutics. The successful candidate will be responsible for the design, execution, and interpretation of *in vitro* experiments with primary immune cells to discover and develop antibodies modulating the tumor microenvironment. Responsibilities of the position include execution of cell-based functional and immunophenotyping assays for antibody lead selection and MOA characterization. The role will support multiple projects and work both independently and collaboratively in a multidisciplinary team setting to ensure timely completion of studies. The role is expected to present experimental findings at internal meetings and through written reports.

Responsibilities:

- Execute *in vitro* studies in collaboration with immuno-oncology in project leads
- Plan and execute primary immune cell-based assays to characterize immunomodulatory antibodies
- Develop and implement immunological assay for antibody evaluation and target validation
- Manage experimental studies and timelines in a fast-paced team environment
- Work independently, establish strategies, and identify actionable undertakings that drive projects in a team environment

Qualifications:

- Bachelor's or master's degree in Immunology, Cell Biology, or related field
- Minimum of five years of experience in life science research
- Strong hands-on expertise in cellular immunology and flow cytometry
- Hands on experience in the characterization of human or murine immune responses is required
- Experience with biologics in the field of cancer immunotherapy is desired
- Experience in the biotech industry is a plus

OncoResponse offers a diverse, inclusive environment, and is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, age, gender identity, sexual orientation, color, religion, sex, marital status, national origin, protected veteran status, disability status, or any other status protected by federal, state, or local laws. We are committed to growing a company of diverse, ethical, mission-driven people who respect and value each other's contribution and differences.
